

CRCS Committee Meeting

Minutes

30/1/15

at The Control Tower Aston Down

Meeting Opened 4:05pm

Present:

Jon Parker, Sid King, David Hancock, Graham Birt, Terry Clarke, Bob Maltby and Dave Alford.

Apologies: None. Unless we count Graham Birt's apology for being late.

No minutes were read.

1. FPV.

Dave Alford explained his use of the system. The BMFA rules were more or less covered and the general consensus was that there was no real problems with it. No reason to ban it as yet.

2. Quads.

The pros and cons of quads and multirotors were discussed. Hovering was considered the biggest problem. Alternate flying spots were considered. The area behind the trees by the carpark for instance. It was decided that multirotors would be allowed but fixed wing would always take priority.

3. A and B tests

We discussed the benefits of having members work towards and achieve at least the A certificate. Bob reminded us, with the help of the BMFA handbook, some of the most important rules.

It was decided to arrange a special meet where members could practice the disciplines of the A test including running through some mock Questions and Answers. It was felt that this would lead to more confidence. The proposed date/s being the first Saturday of the month starting in April. We also felt it would be convenient if we could arrange for Steve Holland, Len Gardiner and Sid King to be on hand.

Meeting Closed 5:15pm
